About Us:

Airex electrical is one of the leading manufacturers of industrial heating elements and temperature sensors known as thermocouples and temperature controllers. Having incorporated in the year 1973, we take pride in being the pioneer and hence the oldest player in the industry. Our quality is unmatched and our products are acknowledged not only in India, but also in other countries. We have been exporting our appliances to **Kenya, Uganda, Egypt, Kazakhstan, Nigeria, South Korea and Nepal.** We have immensely grown over the years and and continue to be the best manufacturing unit in the industry in India. After getting praises and acknowledgments from our customer base, we gradually expanded our range of products and lauched our range of home appliances mainly focusing on electrical storage water heater along with hot place for both commercial and industrial use, electric iron and many other products. Our expertise , quality and delivery is unmatched. We have the ability to deliver any type and quantity of heaters within 72 hours of the order placed before us, and that too without any compromise in terms of quality. We provide customised heating solutions for every industry need and at a very reasonable price. Amongst various heating products, we supply OEM's of Pizza Making Machine, Bakery machines , Spa Equipment, Industrial Boilers, etc. We have the best and a wide range of clientele which includes Brittannia, Relaxo, Swastic Pipe, Indian Air Force, Indian Railways, government hospitals, L&T, Lords, Chloro Alkali and Air India to name a few. Presently, we have our manufacturing units in Bawana Industrial Area.

Vision: We have a broad vision comprising of our long-end aims and far-sightedness. We therefore, aim to: concentrate on industrial sales in North India's industrial areas, **Tamil Nadu and Andaman & Nocobar.** tie-ups with OEMs directly export our appliances to Kenya and Dubai so as to mark our presence globally. provide customer satisfaction to the utmost. provide innovative heating solutions by continuously making efforts of improvement in the excellence through research and ideas.
